

BACKING OPTIONS

PVC Backing

As a type of lightweight yet functional material PVC is widely used in the world. PVC backing carpet is often used in families, schools, hospitals, office buildings, factories, supermarkets, business, sports stadiums and other types of office space. It is soft, colorful, comfortable, durable and easy to clean. It also exhibits properties of non-flammable, self-extinguishing, moisture resistance and many other characteristics.

- PVC backing is complete water and moisture proof.
- PVC carpet tile also has a good fire resistance, antistatic property and dimensional stability.
- Excellent flooring choice for commercial, office building.

PU Backing

PU backing carpet tile provides excellent comfort to your feet and has good acoustic performance and thermal insulation.

Being deformation resistant, it maintains consistency in dimension over time, no glue is required for installation.

Convenient cleaning - it can be taken to clean by yourself at any time and then reinstalled after drying.

Environmental Sustainability - The raw material being used is completely recyclable. We provide product warranty of 15 years.
